MEMORANDUM FOR: Project Security Officer                    16 October 1956

SUBJECT : Proposed Presentation of Information on System #1  
and System #3

1. This will remind you that I have asked you to give a definitive reply to a request I received by telephone on 12 October from [REDACTED] [REDACTED] He has asked that Dean Wooldridge (President of Ramo-Wooldridge) be authorized to discuss System #3 and display photographs of these units suppressing any possible reference to AQUATONE to an audience of unwitting but security-cleared personnel at Wright Air Development Center. My provisional reply to his request was that this would cause no difficulty, provided Dean Wooldridge was properly prepared to fend off any questions about the origin and original application of the Systems thus displayed.

25X1A

2. I would like to have a reply, coordinated with the Contracting Officer, go out to him by 17 October if possible. I believe the reply should comment on his proposed handling of questions and should probably attach at least a CONFIDENTIAL classification (perhaps as high as SECRET) to the equipment including photographs thereof.
